

REPORT

Title :Auto -scanner and submission FORM

objective:

Of our product is to auto submit any type of form in world through using machine learning by scanning all those information in id card and put submit details in forms by scanning then put details in it

Process:

- Step1: The process of these very simple first we will make a software that organise user credential_details and provide level of information like level1 as only considered name,address,phonenumber,etc then level2 information user account id proof ,rc driving licence etc then level3 biometrics stores for this purpose we can dedicated card like rfid which store information but we will even advances that rfid card
- step2: we will convert that information in QR(with level) based info we software organised software organised data as need for particular submission like for bank ,ticket booking it store all information related to family then ask for which info you wanted to give

step3:

machine will accept that qr and put related information in forms by analysing that form structure annotate block for filling and submit forms on like key value pair

Buissness_model

- .sell product to various banks government officials who have to fulfill large form in daily life and generated revenue from that if include card that should be based on chips or sim to bale to control through smartphone

if we target some small sim company they will also invest since it will also promote their buissness this things can used for public as well private and makes betterfor human beings

usecase :banks able to used this to submit form directly by scanning card

hospital user go give card it instantly generate reicipt

railways station where daily used of form is large etc

Algorithm can be used: OCR-engine,cnn,other ml algorithm,qr generation,etc

CONCLUSION :

By completion of these product it will saves time for humans for in their working provide efficiency in their work and reduce unnecesary form fillling which makes queue long so basically this product able to reduce time and provide people comfortability in their life
